Emission Sources - Maximum Allowable Emission Rates

Permit Number 45622

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates (8)	
			lbs/hour	TPY (5)
KS2	Kiln No. 2 Stack	CO	14.46	63.33
		HCl	6.38	24.83
		HF	1.52	6.66
		NO_x	61.81	238.22
		Pb (6)	0.13	0.55
		PM	73.54	283.20
		PM_{10}	29.14	112.06
		$PM_{2.5}$	29.14	112.06

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.
(2) Specific point source name. For fugitive sources, use area name or fugitive source name.
(3) CO - carbon monoxide
HCl - hydrogen chloride
HF - hydrogen fluoride
NO_x - total oxides of nitrogen
Pb - lead
PM - total particulate matter, suspended in the atmosphere, including PM_{10} and $PM_{2.5}$, as represented
PM_{10} - total particulate matter equal to or less than 10 microns in diameter, including $PM_{2.5}$, as represented
$PM_{2.5}$ - particulate matter equal to or less than 2.5 microns in diameter
SO_2 - sulfur dioxide
SO_3 - sulfur trioxide
VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
(4) The hourly emission rate for SO_2 shall be the limit for stack testing purposes. The hourly emission rate for reporting SO_2 compliance with the permit shall be based on a 7-day rolling average from a 24-hour composite analysis of the blended raw feed sulfur content. The annual emission rate for reporting SO_2 compliance with the permit shall be based on a calendar year.
(5) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period.
(6) Emitted as PM and included in the PM and PM_{10} emission rate.
(7) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
(8) Planned startup and shutdown emissions are included. Maintenance activities, except as specified in Special Condition No. 37, are not authorized by this permit and will need separate authorization, unless the activity can meet the conditions of 30 TAC § 116.119.

Date: October 30, 2019
