EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 81011

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
(2) Specific point source names. For fugitive sources use area name or fugitive source name.
(3) PM - particulate matter suspended in the atmosphere, including PM_{10}.
PM_{10} - particulate matter of 10 microns or less in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.
VOC - volatile organic compounds as defined in 30 Texas Administrative Code § 101.1
CO - carbon monoxide
NO_X - total oxides of nitrogen
SO_2 - sulfur dioxide
H_2S - hydrogen sulfide
CH_20 - formaldehyde
COS - carbonyl sulfide
HAPS - any of the Section 112(b), Federal Clean Air Act named compounds
(4) Fugitive emissions are an estimate only.
(5) HAPS other than H2S, CH20, and COS are included in the PM and VOC emission rates.
