

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 19641

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

as a maximum allowable emission rate.

- (5) Maximum combined annual emissions from Emission Point Nos. LD1, LD2, and LD3 shall not exceed 0.13 TPY.
- (6) Maximum allowable emission rate after FB-47 and FB-34 Evaporator Overheads are routed to the Plant Flare (EPN RA-22) as required by Special Condition 14.
- (7) Maximum allowable emission rate prior to routing FB-47 and FB-34 Evaporator Overheads to the Plant Flare (EPN RA-22) as required by Special Condition 14. This will not be an emission point after that date.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:
