

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 72179

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

| Emission<br>Point No. (1) | Source<br>Name (2)        | Air Contaminant<br>Name (3) | Emission Rates * |      |
|---------------------------|---------------------------|-----------------------------|------------------|------|
|                           |                           |                             | lb/hr            | TPY  |
| 1                         | Truck Receiving Pit No. 1 | PM<br>PM10 0.60             | 4.08             |      |
| 2                         | Truck Receiving Pit No. 2 | PM<br>PM10 0.60             | 4.08             |      |
|                           | Total Receiving Operation | PM<br>PM10                  | 0.12             | 0.80 |
| 3                         | Truck Loadout No. 1       | PM<br>PM10 4.35             | 12.90            |      |
| 4                         | Truck Loadout No. 2       | PM<br>PM10 4.35             | 12.90            |      |
| 5                         | Rail Loadout              | PM<br>PM10 2.90             | 8.60             |      |
|                           | Total Loadout Operation   | PM<br>PM10                  | 1.37             | 4.07 |

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) PM -particulate matter, suspended in the atmosphere, including PM<sub>10</sub>.

PM<sub>10</sub> -particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.

\* Refer to Special Condition No. 1 for throughput limitations and basis of emission rates.
