

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 5264

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM<sub>10</sub> - particulate matter less than 10 microns in diameter  
VOC - volatile organic compounds as defined in General Rule 101.1  
NO<sub>x</sub> - total oxides of nitrogen  
SO<sub>2</sub> - sulfur dioxide  
CO - carbon monoxide  
HCl - hydrogen chloride  
Br - bromine
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Emission rate at HDPE annual production rate of 400 million (MM) pounds per year and below.
- (6) Emission rate at HDPE annual production rate of 450 MM pounds per year.
- (7) This EPN will be deleted when the vent for Tanks F240 and F250 is tied in to the temporary Flare, TEMP-FL.
- (8) The temporary Flare, TEMP-FL, will be replaced by the Incinerator, INCN. Emission Point No. TEMP-FL will be deleted when the Incinerator, INCN, is operational.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:
