

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 28867

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission		Rates*
			lb/hr	ton/yr	
1	Bagging Operation (a), (4)	TSP	1.04		0.10
		PM ₁₀	0.52		0.05
2	Truck Bulk Loadout (b), (4)	TSP	3.11		0.10
		PM ₁₀	1.55		0.05

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP - total suspended particulate including PM₁₀
PM₁₀ - particulate matter less than 10 microns in diameter
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (a) Emission rates are based on and the facilities are limited to an hourly throughput of 2,465 bushels and an annual throughput of 502,215 bushels of bagged grain.
- (b) Emission rates are based on and the facilities are limited to an hourly throughput of 2,465 bushels and an annual throughput of 167,430 bushels of grain.
