

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 87207

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY**
7, 8, and 9	Central Baghouse (5)	PM ₁₀	0.56	1.30
1 - 6	Material Drop Points (4)	PM	3.56	8.32
		PM ₁₀	1.71	4.00
STK	Stockpiles (4)(6)	PM	-	1.08
		PM ₁₀	-	0.54

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) PM - particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}

PM_{2.5} - particulate matter equal to or less than 2.5 microns in diameter

PM₁₀ - particulate matter equal to or less than 10 microns in diameter

(4) Fugitive emissions are an estimate only.

(5) Sources being vented to the central baghouse include the two storage silos, the cement weigh hopper and the truck drop point.

(6) Emissions are based on one acre of stockpile.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule and production rates:

15 Hrs/day 6 Days/week 52 Weeks/year or 4,680 Hrs/year

Maximum Production: 150 yd³/hr and 702,000 yd³/yr

** Compliance with annual emission limits is based on a rolling 12-month period.
