

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 40972

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Benzene emissions are not included in the total VOC emission value.
- (6) Cumulative annual emissions from anyone or a combination of these tanks shall not exceed 0.14 TPY of VOC.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

\_\_\_\_\_ Hrs/day \_\_\_ Days/week \_\_\_Weeks/year or 8,760 Hrs/year

\*\* Compliance with annual emission units is based on a rolling 12-month period.
