

# Emission Sources - Maximum Allowable Emission Rates

Permit Number 55046

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Emission Sources - Maximum Allowable Emission Rates

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1  
NO<sub>x</sub>- total oxides of nitrogen  
SO<sub>2</sub>- sulfur dioxide  
PM - particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>  
PM<sub>10</sub> - particulate matter equal to or less than 10 microns in diameter  
PM<sub>2.5</sub> - particulate matter equal to or less than 2.5 microns in diameter  
CO - carbon monoxide  
HCl- hydrogen chloride  
Cl<sub>2</sub> - chlorine
- (4) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (5) EO-EG Unit contribution only - not including guard bed regeneration.
- (6) Includes maintenance, startup, and shutdown (MSS) activities authorized in MSS permit conditions. The 26UTLFLR and 26UTLFLRTMP shall not be operated at the same time. Total annual emissions from 26UTLFLR and 26UTLFLRTMP combined shall not exceed the stated tons per year emission rate.
- (7) Includes MSS activities authorized in MSS permit conditions for the EO and EG Units only.
- (8) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
