

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 6994

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Emission Point No. (1)	Source Name (2)	Name (3)	AIR CONTAMINANTS DATA		
			Air Contaminant lb/hr TPY	<u>Emission Rates *</u>	
RC-1	Rock Crusher (4)		TSP	0.75	0.042
			PM10	0.05	0.024
RC-2	Screening (4)		TSP	0.43	0.24
			PM10	0.21	0.12
RC-3	Material Handling (4)		TSP	0.08	1.50
			PM10	0.04	0.75
1	Plantwide Material Handling (4)		TSP	5.00	5.20
			PM10	2.50	2.60

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) TSP - total suspended particulate matter (including PM10)
PM10 - particulate matter less than 10 microns
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule and production rates:

Hrs/day 8 Days/week 5 Weeks/year 52 or Hrs/year _____
Crushed brick production: Tons/hour 10 Tons/year 10,000

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES
