

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

S-9946

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source		Air Contaminant		<u>Emission Rates *</u>
	Name (2)	Name (3)	lb/hr	TPY	
1-10	Doors			VOC(4)	20.8
INC-1	Incinerator Stack			VOC	17.3 3.67
				NOx	3.5
				SO2	<1.0
				CO	<1.0
				PM/PM10	<1.0
				VOC ₁	0.50

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in General Rule 101.1
VOC₁ - unspecified VOC-containing materials which have an emission rate equal to or less than the same category of approved materials specified in the application and ESL which is equal to or higher than the ESL for approved materials of the same category as listed in the August 1, 1991, (or later dated) edition of the TACB guidelines document.
NOx - total oxides of nitrogen
SO2 - sulfur dioxide
PM - particulate matter
PM10 - particulate matter less than 10 microns
CO - carbon monoxide
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8760
