

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 23035

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY
1	Scrubber Stack	PM ₁₀	<0.01	<0.002

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM₁₀ - particulate matter (PM) equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule and annual wire usage rates:

Hrs/day 4 Days/week 5 Weeks/year 52 or Hrs/year 1,040

WS975 BOND Wire: 150 pounds per year (lbs/yr)

WS420 Stainless Steel Wire: 2,200 lbs/yr

Wire used shall be the specific types named above or a commercially available metallurgical equivalent of the above-named alloys. The wire content specified in Special Condition No. 5 shall not be exceeded.
