

Emission Sources - Maximum Allowable Emission Rates

Permit Number 72985

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates	
			lbs/hour	TPY (4)
T1518	Tank 1518	VOC	1.45	5.50
T1862	Tank 1862	VOC	1.45	5.50
T1995	Tank 1995	VOC	1.14	4.18
Tanks Annual Emission Cap	Tanks 1518, 1862 and 1995	VOC		10.83
Fugitives	Fugitive Sources (5)	VOC	0.01	0.05

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1.
HAP - Hazardous Air Pollutant (HAP) emissions are included in the VOC emissions and consist of benzene, 2,2,4 – trimethylpentane, ethylbenzene, hexane, toluene and xylene, The combined emissions of all sources of HAPs at this site is limited to less than 10 TPY of any single HAP and less than 25 TPY of any combination of aggregate HAPs. Records of speciated HAP emissions will be maintained on site to confirm that this requirement is being met on a rolling 12-month basis.
- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
