

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 46560

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code ' 101.1, not including hexane

Hexane - a VOC and hazardous air pollutant as defined in Title 40 Code of Federal Regulations Part 63

TiCl₄ - titanium tetrachloride

NO_x - total oxides of nitrogen

CO - carbon monoxide

SO₂ - sulfur dioxide

PM - particulate matter, suspended in the atmosphere, including PM₁₀

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.

HCl - hydrogen chloride

(4) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

(5) Emissions of VOC, Hexane, and PM are combined into an hourly and annual cap for all four product silo baghouses, railcar loading baghouse, fines fluid bed dryer, and PM for the four product silo baghouses.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

24 Hrs/day 7 Days/week 52 Weeks/year or 8,760 Hrs/year

** Compliance with annual emission limits is based on a rolling 12-month period.
