

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 2986

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP - total suspended particulate including PM10
PM10 - particulate matter less than 10 microns in diameter

* This facility can only load out of two spouts simultaneously.

- (a) Emission rates are based on and the facilities are limited to an hourly throughput rate of 55 tons of grain.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (b) Emission rates are based on and the facilities are limited to an annual throughput rate of 1,425 tons of grain.
