

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 18553

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification

(2) Specific point source name.

- (3) PM - particulate matter
VOC - volatile organic compounds as defined in General Rule 101.1
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760

- ** Total annual VOC emissions from this plant shall not exceed 179.6 tons per year. Individual source annual emissions shall not exceed the amount listed.
- *** Total combined annual VOC emissions from these EPNs shall not exceed 100 tons per year. These EPNs remain subject to the plant-wide limitation in ** above.
