

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

22304

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

Emission Point No. (1)	Source		Air Contaminant		<u>Emission Rates</u> *	
	Name (2)	Name (3)	lb/hr	TPY		
FE-1	Process/Drop Points (4)			TSP	13.60	14.12
	PM10	6.73	6.98			
FE-2	Roads/Stockpiles (4)			TSP	-	2.41
				PM10		1.20
FE-3	Cement Silo - Vent Style Baghouse			PM10	0.68	0.70

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP - Total suspended particulate matter including PM10.  
PM10 - particulate matter less than 10 microns in diameter.
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 8 Days/week 5 Weeks/year 52 or Hrs/year 2,080

Based on a maximum hourly production rate of 150 tons, and a maximum annual rate of 312,000 tons of concrete crushed.

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Cement silo emissions based on a maximum hourly production of 25 tons, and a maximum annual rate of 52,000 tons of cement mixed.
