

## Emission Sources - Maximum Allowable Emission Rates

Permit Number 3247

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### Air Contaminants Data

| Emission Point No.<br>(1) | Source Name (2)            | Air Contaminant Name (3) | Emission Rates (5) |         |
|---------------------------|----------------------------|--------------------------|--------------------|---------|
|                           |                            |                          | lbs/hour           | TPY (4) |
| 1                         | Truck Receiving Pit No. 1  | PM                       | 5.71               | --      |
|                           |                            | PM <sub>10</sub>         | 0.84               | --      |
| 2                         | Truck Receiving Pit No. 2  | PM                       | 4.76               | --      |
|                           |                            | PM <sub>10</sub>         | 0.70               | --      |
| 3                         | Truck Receiving Pit No. 3  | PM                       | 4.76               | --      |
|                           |                            | PM <sub>10</sub>         | 0.70               | --      |
| 4                         | Truck Receiving Pit No. 5  | PM                       | 3.06               | --      |
|                           |                            | PM <sub>10</sub>         | 0.45               | --      |
|                           | Total Receiving Operations | PM                       | --                 | 0.85    |
|                           |                            | PM <sub>10</sub>         | --                 | 0.13    |
| 5                         | Dryer                      | PM                       | 22.16              | 3.32    |
|                           |                            | PM <sub>10</sub>         | 5.66               | 0.85    |
|                           |                            | CO                       | 1.76               | 0.26    |
|                           |                            | NO <sub>x</sub>          | 2.09               | 0.31    |
|                           |                            | SO <sub>2</sub>          | 0.01               | < 0.01  |
|                           |                            | VOC                      | 0.12               | 0.02    |
| 6                         | Truck Loadout No. 1        | PM                       | 28.90              | --      |
|                           |                            | PM <sub>10</sub>         | 9.74               | --      |
| 7                         | Truck Loadout No. 2        | PM                       | 24.08              | --      |
|                           |                            | PM <sub>10</sub>         | 8.12               | --      |
| 8                         | Rail Loadout               | PM                       | 9.07               | --      |
|                           |                            | PM <sub>10</sub>         | 0.74               | --      |
|                           | Total Loadout Operations   | PM                       | --                 | 4.30    |

Emission Sources – Maximum Allowable Emission Rates

|  |  |                  |    |      |
|--|--|------------------|----|------|
|  |  | PM <sub>10</sub> | -- | 1.45 |
|--|--|------------------|----|------|

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) CO - carbon monoxide  
NO<sub>x</sub> - total oxides of nitrogen  
PM - total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented  
PM<sub>10</sub> - total particulate matter equal to or less than 10 microns in diameter, including PM<sub>2.5</sub>, as represented  
SO<sub>2</sub> - sulfur dioxide  
VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- (4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period.
- (5) Planned startup and shutdown emissions are included. Maintenance activities are not authorized by this permit.
