- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
PCBTf - parachlorobenzotrifluoride
PM - particulate matter, suspended in the atmosphere, including PM₁₀
PM₁₀ - particulate matter equal to or less than 10 microns in diameter.
NO_x - total oxides of nitrogen
CO - carbon monoxide
SO₂ - sulfur dioxide
- (4) Compliance with annual emission limits is based on a rolling 12-month period.
- (5) These hourly emissions include combined sitewide emissions from all surface coating facilities that are discharged through stacks including (but not limited to) the following:
