

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 44215

This table lists the maximum allowable emission rates for all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names.
- (3) VOC - volatile organic compounds as defined in 30 TAC Section 101.1
 PM - particulate matter, suspended in the atmosphere, including PM₁₀.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

* The facilities are limited by the following maximum operating schedule:

24 hours per day for 5 ½ days per week and 6,864 hours per year.
