

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 436

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates*

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

E09A099	Truck Loading and Unloading Acetone	Acetone	18.0	<0.1
---------	--	---------	------	------

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) CO -carbon monoxide
- NO<sub>x</sub> - total oxides of nitrogen
- PM - particulate matter, suspended in the atmosphere, including PM<sub>10</sub>.
- PM<sub>10</sub> - particulate matter equal to or less than 10 microns in diameter.  
Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
- SO<sub>2</sub> - sulfur dioxide
- VOC - volatile organic compounds as defined in General Rules 101.1.
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) These emissions rates are applicable to each individual furnace. Cumulative emissions from Furnace Nos. 1 through 20 can be obtained by multiplying the individual emission rates by a factor of 20. Short-term emission rates are based upon an 85.9 MMBtu/hr heat input. Annual emission rates are based upon a 77.265 MMBtu/hr heat input and 90.6 percent on-stream factor (7,937 hours per calendar year).

\* Except when noted, emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760
