

# Emission Sources - Maximum Allowable Emission Rates

Permit Numbers 109148 and PSDTX1358

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## Air Contaminants Data

| Emission Point No.<br>(1) | Source Name (2)                | Air Contaminant Name<br>(3) | Emission Rates |         |
|---------------------------|--------------------------------|-----------------------------|----------------|---------|
|                           |                                |                             | lbs/hour       | TPY (4) |
| TURB1                     | Turbine 1<br>GE 7F5 202 MW     | NO <sub>x</sub>             | 64             | 141.0   |
|                           |                                | NO <sub>x</sub> (MSS)       | 56             |         |
|                           |                                | CO                          | 32             | 260.2   |
|                           |                                | CO (MSS)                    | 338.7          |         |
|                           |                                | VOC                         | 3              | 31.24   |
|                           |                                | VOC (MSS)                   | 45.3           |         |

## Emission Sources - Maximum Allowable Emission Rates

|           |                 |                   |       |       |
|-----------|-----------------|-------------------|-------|-------|
|           |                 | PM <sub>2.5</sub> | 0.002 | 0.01  |
| DIES-TANK | Diesel Tank (6) | VOC               | 0.027 | 0.001 |

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- NO<sub>x</sub> - total oxides of nitrogen
- SO<sub>2</sub> - sulfur dioxide
- PM - total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented
- PM<sub>10</sub> - total particulate matter equal to or less than 10 microns in diameter, including PM<sub>2.5</sub>, as represented
- PM<sub>2.5</sub> - particulate matter equal to or less than 2.5 microns in diameter
- CO - carbon monoxide
- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period. Annual emission limits include planned maintenance, startup, and shutdown (MSS) activities.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) Emission rates include planned MSS activities.
