

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 3050

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) TSP - total suspended particulate including PM₁₀

PM₁₀ - particulate matter less than 10 microns in diameter

(a) Emission rates are based on and the facilities are limited to an hourly throughput of 140 tons of grain.

(b) Emission rates are based on and the facilities are limited to an annual throughput of 120,000 tons of grain.
