

Emission Sources - Maximum Allowable Emission Rates

Permit Number 56686

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) NH₄Cl, ZnO, ZnCl₂, Zn, and NH₃ are included in the PM.
- (6) Planned startup and shutdown emissions are included. Maintenance activities, are not authorized by this permit and will need separate authorization, unless the activity can meet the conditions of 30 TAC § 116.119.
