

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 42682

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

INCIN	Incinerator Fugitives (4)	VOC	0.34	1.49
-------	---------------------------	-----	------	------

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) NO_x - total oxides of nitrogen
VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code Section 101.1
CO - carbon monoxide
PM - particulate matter, suspended in the atmosphere, including PM₁₀.
PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
SO₂ - sulfur dioxide
HCl - hydrochloric acid
NH₃ - ammonia
- (4) Fugitive emissions are based on the fugitive component count provided in the application and the control factors for the 28VHP Leak Detection and Repair Program.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

8,760 hrs/yr

** Compliance with annual emission limits is based on a rolling 12-month period.
