

SPECIAL CONDITIONS

Permit No. 5053

EMISSION LIMITATIONS

1. The total emissions of air contaminants from any of the sources shall not exceed the values stated on the attached table entitled "Emission Sources - Maximum Allowable Emission Rates."

STORAGE AND LOADING

2. The service of Tank Nos. 01002 and 01003 is limited to the storage of condensate or chemicals that are covered by one of the Texas Natural Resource Conservation Commission (TNRCC) standard exemptions. Storage of other chemicals is prohibited unless prior approval for such storage is obtained from the Executive Director of the TNRCC. It will not be necessary to obtain reapproval for chemicals previously approved for storage in these tanks.
3. The holder of this permit shall maintain a monthly emissions record which describes emissions of volatile organic compounds (VOC) from all storage tanks and loading operations. The record shall include tank or loading point identification number, tank or vessel capacity in gallons, name of the material stored or loaded, VOC monthly average temperature in degrees fahrenheit, and VOC vapor pressure at the monthly average material temperature in psia. Additionally, records of the throughput for this facility shall be maintained. These records shall be maintained at the plant site for at least two years and be made available to representatives of the TNRCC upon request.
