EMISSION SOURCES - EMISSIONS CAPS AND INDIVIDUAL  
EMISSION LIMITATIONS

Permit No. 37200

This table lists the emissions caps and individual emission limitations for all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. for fugitive sources use area name or fugitive source name.

(3) VOC - volatile organic compounds as defined in General Rule 101.1 (unspeciated)

NO<sub>x</sub> - total oxides of nitrogen

CO - carbon monoxide

(4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

(5) The VOC from the VCU is accounted for in the Gasoline and Diesel Cap.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/year

\*\* The annual rates are based on a rolling 12-month year rather than the calendar year.
