Project Overview

E. R. Carpenter, L.P. (Carpenter) submitted an alteration request to remove and transfer previously authorized blending operations from NSR Permit No. 4757 to a new permit for management purposes. This constitutes an administrative split. The company asserts it will be easier to manage their two processes with two individual permits. Permit No. 4757 currently authorizes polyol manufacturing operations and blending operations at Carpenter's Roger W Powell Plant in Harris County. Accordingly, this project proposes to remove all EPNs and special conditions associated with the company's blending process from Permit No. 4757.
