

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 29407

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM - particulate matter, suspended in the atmosphere, including PM₁₀.
PM₁₀ - particulate matter less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.
- (4) Fugitive emissions are an estimate only.

- * Emission rates are based on and the facilities are limited by the following maximum operating schedule and production rates:

Hrs/day 24 Days/week 7 Weeks/year 52

Cone Crusher: 240 Tons/hour 800,000 tons/year

Impact Crusher: 300 Tons/hour 286,361 tons/year

Jaw Crusher: 600 Tons/hour 2,000,000 tons/year

Stone and Sand production: 600 tons/hour 2,000,000 tons/year

- ** Compliance with annual emission limits is based on a rolling 12-month period.
