

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Flexible Permit Number 72761

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code ' 101.1
HAP - hazardous air pollutant emissions are included in the VOC emissions and consist of 2,2,4 - trimethylpentane, benzene, ethylbenzene, hexane, toluene, and xylene
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate. They are not included in the emission caps.
- (5) The combined emissions of all sources of HAPs at this site is limited to less than 10 tons per year (tpy) of any single HAP and less than 25 tpy of any combination of aggregate HAPs. Records of speciated HAP emissions will be maintained on-site to confirm that this requirement is being met on a rolling 12-month basis.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

8,760 hrs/year.

** Compliance with annual emission limits is based on a rolling 12-month period.
