

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Nos. 22508 and PSD-TX-874

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in 30 Texas Administrative Code Section 101.1
 - PM - particulate matter
 - CO - carbon monoxide
 - NO_x - nitrogen oxides
 - NH₃ - ammonia
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Emissions do not include emergency releases to the flare.
- (6) Allowable emission rate until pump seals have been upgraded as required by Special Condition No. 9.
- (7) Allowable emission rate after construction and initial operation of G line.
- (8) Allowable emission rate until October 31, 1998 or initial operation of G-line, whichever occurs first.
- (9) Allowable emission rate after October 31, 1998 or initial operation of G-line, whichever occurs first.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:
