

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Nos. 38755 and N016

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) VOC - volatile organic compounds as defined in 30 Texas Administrative Code 101.1

NO_x - total oxides of nitrogen

SO₂ - sulfur dioxide

PM - particulate matter, suspended in the atmosphere, including PM₁₀.

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall

be assumed that no particulate matter greater than 10 microns is emitted.

CO - carbon monoxide

HF - hydrogen fluoride

SnCl₄ - tin tetrachloride

MDPD - mixed diaryl p phenylene diamine

(4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

(5) These emissions are for the Specialty Polymer Plant's (850 Unit) contribution to this flare which is permitted under Permit No. 22110.

(6) These emissions are for the Specialty Polymer Plant's (850 Unit) contribution to this flare which is permitted under Permit No. 9481.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:
