

# EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 5171

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant=s property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

#### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3)

CO	-	carbon monoxide
NO <sub>x</sub>	-	nitrogen oxides
SO <sub>2</sub>	-	sulfur dioxide
VOC	-	volatile organic compounds as defined in Title 30 Texas Administrative Code ' 101.1
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Hourly emissions cap covers simultaneous re-filling of tanks pursuant to Special Condition No. 17.
- (6) Annual emissions cap for tanks covers routine emissions, tank roof landings and degassing.
- (7) These are maximum VOC emissions during one hour of tank degassing. Annual tank degassing emissions are authorized under the annual emission cap for all tanks.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:  
24 Hrs/day 7 Days/week 52 Weeks/year

Permit Number 5171

Page 11

\*\* Compliance with annual emission limits is based on a rolling 12-month period.

Date August 6, 2008
