

0EMISSION SOURCES - EMISSIONS CAPS AND INDIVIDUAL EMISSION LIMITATIONS

Permit Numbers 6825A, PSDTX49, and N65

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - EMISSIONS CAPS AND INDIVIDUAL EMISSION LIMITATIONS

- (1) Emission point identification - either specific equipment designation or emission point number (EPN) from a plot plan per Attachment 1.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
 - NO_x - total oxides of nitrogen
 - SO₂ - sulfur dioxide
 - CO - carbon monoxide
 - PM - particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}.
 - PM₁₀ - particulate matter equal to or less than 10 microns in diameter.
 - PM_{2.5} - particulate matter equal to or less than 2.5 microns in diameter
 - H₂S - hydrogen sulfide
 - HCl - hydrogen chloride
 - HF - hydrogen fluoride
 - MTBE - methyl-tertiary-butyl ether
- (4) Emission rate is an estimate and compliance is demonstrated by meeting the requirements of the applicable special conditions and permit application representations.
- (5) Rates effective after facilities associated with COEX II Project are operating.
- (6) Caps effective after sources associated with COEX II Project and EPNs E-01-19BH, E 02 19BH, and E-03-19BH are operating. Boilerhouse 15 low NO_x burner project and shutdown of Boilerhouse 16 combustion units must be complete.
- (7) Allowable emission rates prior to the Boilerhouse 15 low NO_x burner project.
- (8) Allowable emission rates after the Boilerhouse 15 low NO_x burner project authorized by Standard Permit 91911. The turbine GTG-1 shall be shutdown as part of this project.
- (9) The VOC emissions from COEX II facilities are subject to a separate emission limit in order to establish enforceable emission limits for these sources which are authorized by Nonattainment Permit Number 65.
- (10) The Boilerhouse 16 units must be shutdown and the Boilerhouse 15 low NO_x burner project completed prior to the end of the 180 day shakedown period allowed in Special Condition 56 for Boilerhouse 19 Boilers 1, 2, and 3.
- (11) The maintenance, startup, and shutdown (MSS) emissions authorized in Permit Number 80812 must be added to Permit Number 6825A, PSDTX49, and N65 operating emissions to determine compliance with these emission caps unless designated with a footnote (13).
- (12) These emission caps have been carried forward from the flexible permit. The emission caps that are not designated with a footnote (13) are those that are more limiting than the sum of the individual emission rate limits for those facilities.
- (13) These emission caps are the sum of the individual and subcap emission rates for the pollutant and are shown for information only.

EMISSION SOURCES - EMISSIONS CAPS AND INDIVIDUAL EMISSION LIMITATIONS

- (14) These allowable emission rates shall apply in lieu of those designated with footnote (8) if the permit holder samples these facilities for PM_{2.5} per Special Condition 40 after completing the Boilerhouse 15 low NOx burner project and the results show PM_{2.5} emissions are less than 73 percent of the maximum hourly PM emission rate limit.
- (15) These allowable emission rates shall apply in lieu of those normal operation emission rates for the boiler designated with footnote (10) if the permit holder samples the boiler for PM_{2.5} per Special Condition 40 and the results show PM_{2.5} emissions are less than 84 percent of the maximum hourly PM emission rate limit.

* Emission rates are based on operating 8,760 hrs/year.

** Compliance with annual emission limits is based on a rolling 12-month period

Dated May 8, 2012
