

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Flexible Permit Number 18897

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- NO_x - total oxides of nitrogen
- CO - carbon monoxide
- PM - particulate matter, suspended in the atmosphere, including PM₁₀.
- PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.
- SO₂ - sulfur dioxide
- COS - carbonyl sulfide
- H₂S - hydrogen sulfide
- H₂SO₄ - sulfuric acid
- HCl - hydrochloric acid

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (4) Emission rates are an estimate and enforceable through compliance with the applicable special condition(s) and permit application representations.
- (5) Only pilot emissions are authorized for these combustion sources.
- (6) Planned maintenance startup and shutdown emissions associated with authorized activities.
- (7) Planned Start-up and shutdown emissions for periods not to exceed 144 hours on a rolling 12-month basis only.
- (8) Planned Maintenance startup and shutdown emissions are based on 12 hours of startup time on a rolling 12-month basis.
- (9) Planned Maintenance startup and shutdown emissions are based on 72 hours of startup time on a rolling 12-month basis.
- (10) Planned Maintenance startup and shutdown emissions associated with process vessel blowdowns activities that are limited to 6 hours on a rolling 12-month basis.
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:

24 Hrs/day 7 Days/week 52 Weeks/year

- ** Compliance with annual emission limits is based on a calendar year basis for the first eight years after this permit was issued, and a rolling 12-month basis thereafter.
