

Emission Sources - Maximum Allowable Emission Rates

Permit Number 5064 and N001

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

 - (4) Clean Harbors Deer Park, LLC., is also subject to the Mass Emissions Cap and Trade Program as outlined in Title 30 Texas Administrative Code § 101.351. The Mass Cap and Trade Program limits annual NO_x emissions to a prescribed schedule of allowances, which are lower than the existing permit allowables.
 - (5) Emission rate is an estimate and compliance is demonstrated by meeting the requirements of the applicable special conditions and permit application representations:
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:
- Engines at 50 hours per year total.
 - Pumps at 50 hours per year each.
 - All emission rates are based on continuous operation.
- ** Compliance with annual emission limits is based on a rolling 12-month period. The annual emission limits for Emission Point Nos. (EPNs) E-4-I and E-4-II are based on the calendar year. Emissions of air contaminants from EPNs E-4-I and E-4-II are permitted under NA and State.
