

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 73238

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY**
47	Power Boiler No. 102	NO _x ***	6.42	25.3
		CO***	7.92	31.2
		VOC	0.58	2.3
		SO ₂	1.50	5.9
		PM ₁₀	0.80	3.2

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
 NO_x - total oxides of nitrogen
 SO₂ - sulfur dioxide
 PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
 CO - carbon monoxide

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day ____ Days/week ____ Weeks/year or 8,760 Hrs/year

** Compliance with annual emission limits is based on a rolling 12-month period. The tons per year is based on an annual gas usage of 843.3 million standard cubic feet.

*** The emission limits for NO_x and CO shall not be effective until March 1, 2009. **(02/08)**

Dated February 21, 2008
