

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

19989

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source		Air Contaminant		Emission Rates *	
	Name (2)	Name (3)	lb/hr	TPY		
1		Central Baghouse		PM ₁₀	0.47	0.74
2		Process Drop Point		TSP	0.95	0.42
		Fugitives (4)		PM ₁₀	0.47	0.22
3		Stockpile and Road		TSP		0.53
		Fugitives (4)		PM ₁₀		0.26

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP - total suspended particulate matter including PM₁₀
PM₁₀ - particulate matter less than 10 microns in diameter
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule. Maximum hourly production of 135 cubic yards per hour of ready mix concrete and maximum yearly production of 100,000 cubic yards per year of ready mix concrete.

Hrs/day 10 Days/week 6 Weeks/year 52 or Hrs/year 3,120
