

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 19563

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	<u>Emission Rates</u>	
			lb/hr	TPY
No. 2	Shiploader*	PM	33.60	10.42
		PM ₁₀ 16.80	5.21	
	Dust Collector**	PM ₁₀	1.72	5.0

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) PM - particulate matter, suspended in the atmosphere, including PM₁₀.

PM₁₀ - particulate matter less than or equal to 10 microns in diameter. Where PM is not listed, it shall

be assumed that no particulate matter greater than 10 microns is emitted.

Emission rates are based on the following:

* Trimming operations (uncontrolled) are limited to an hourly throughput of 4,000 bushels and an annual throughput of 2.34 million bushels of grain

** Normal operations (controlled by dust collector) are limited to: an hourly throughput of 40,000 bushels; a total annual throughput (including trimming operations) of 46.7 million bushels of grain; and a maximum operating schedule of 5,824 hours per year.
