

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 32201

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) ZnO - zinc oxide

Zn - zinc

Pb - lead

Fe - iron

Al - aluminum

Cl - chlorides

PM₁₀ - particulate matter less than 10 microns in diameter including the listed speciated particulates, as well as the following elements and/or compounds of these elements: copper, iron, aluminum, cadmium, chromium, barium, arsenic, silver, mercury, selenium, and tin. Refer to Table 2, dated October 18, 1995, in the permit file for emission limits for these elements and/or compounds.
