

Emission Sources - Maximum Allowable Emission Rates

Permit Number 6148B

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates (5) *	
			lbs/hour	TPY
1-5	Material Handling (4)	PM	< 0.01	< 0.01
		PM ₁₀	< 0.01	< 0.01
6	Central Baghouse	PM ₁₀	0.55	1.81
Mixer to Vehicle	Batch Drop	PM ₁₀	0.05	0.02
Fugitives	Stockpiles (4)	PM	--	0.36
		PM ₁₀	--	0.18

- (1) Emission point identification - either specific equipment designation or emission point number (EPN) from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) PM - total particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}, as represented
PM₁₀ - total particulate matter equal to or less than 10 microns in diameter, including PM_{2.5}, as represented
- (4) Fugitive emissions are an estimate only. Emission rates are cumulative value for all of the emission points identified.
- (5) Planned startup and shutdown emissions are included. Maintenance activities are not authorized by this permit.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule and production rates:

24 Hrs/day 7 Days/week 52 Weeks/year or 8,736 Hrs/year

Total hourly production: 120 cubic yards per hour

Total annual production: 120,000 cubic yards per hour

Date: April 10, 2013
