### Project Overview

Seminole Service Gin, Inc is proposing to alter the special conditions relating to burr pile storage in order to make them consistent with other cotton gin permits and to reflect that the burr pile exhaust goes directly to the burr pile.

The changes requested under this alteration of representations at this facility do not change the previous impacts evaluation and there is no expectation of adverse impacts. This alteration does not authorize an increase in emissions, change in method of control, or a change in character of emission. The Special Conditions have been updated to reflect the requested changes.
