

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 21549

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name	<u>Emission Rates</u>	
			lb/hr	TPY
M-1206	Vapor Degreaser	Trichloroethylene	45.0	12.0
M-1229*	Mix Building	Perfluoro PF-5060	150.0	18.0
M-1230*	Mix Building	Perfluoro PF-5060	150.0	18.0

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.

The facilities are limited by the following maximum operating schedule:

Hrs/day\_\_\_Days/week\_\_\_Weeks/year\_\_\_or Hrs/year 8,760

Hourly emission rates for M-1230 are based on the maximum flow rate of the vacuum pump. Yearly emission rates are based on 24 mixes per year, 3,000 pounds PF-5060 per mix at 50 percent recovery.

- \* The sum total of PF-5060 emissions from M-1229 and M-1230 shall not exceed 18 tpy.
