

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Flexible Permit Number 72761

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1.
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.  
They are not included in the emission caps.
- (5) The emission rate is applicable until Tanks (EPNs T1219, T1220, T1266, and T1333) are all equipped with rim-mounted secondary seal in accordance with Special Condition No. 2 of this permit. All these tanks must be upgraded by February 5, 2007.
- (6) The emission rate is applicable after Tanks (EPNs T1219, T1220, T1266, and T1333) are all equipped with rim-mounted secondary seals in accordance with Special Condition No. 2 of this permit. The remainder of all tanks authorized by this permit shall be equipped with rim-mounted secondary seals by March 1, 2008.
- (7) The emission rate is applicable after all tanks authorized by this permit are equipped with the rim-mounted secondary seals in accordance with Special Condition No. 2 of this permit. All seals must be installed by March 1, 2008.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

8,760 hrs/year.

\*\* Compliance with annual emission limits is based on a rolling 12-month period.
