

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 17295

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

- (3) PM - particulate matter, suspended in the atmosphere, including PM₁₀
 PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.
 VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code ' 101.1.
 NO_x - total oxides of nitrogen
 SO₂ - sulfur dioxide
 CO - carbon monoxide
 H₂SO₄ - sulfuric acid mist
 Hg - total mercury emissions
 Ni - total nickel emissions

* For Emission Point Nos. 2-1, 2-11, and 2-12, emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760

All other emission points are operated on an as needed basis, but not to exceed their annual emissions limits.

** PM₁₀ emission rate is for front-half of sampling train only for Emission Point No. 2-1.

*** Hourly VOC emissions from the fluidized bed combustor may vary by two orders of magnitude.

**** Hourly SO₂ limit is based on a rolling three-hour average.
