

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 82400L001

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) PM - particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}
PM₁₀ - particulate matter equal to or less than 10 microns in diameter
- (4) Fugitive emissions are an estimate only.
- (5) Drop points include the following emission points: drop off the hopper and drops off the screen.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

10 Hrs/day 6 Days/week 52 Weeks/year or 3,120 Hrs/year

Maximum Total Facility: 250 Tons/hour and 500,000 Tons/year

** Compliance with annual emission limits is based on a rolling 12-month period.
