

## Emission Sources - Maximum Allowable Emission Rates

Permit Number 2388

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) CO - carbon monoxide  
 NO<sub>x</sub> - total oxides of nitrogen  
 PM - total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented  
 PM<sub>10</sub> - total particulate matter equal to or less than 10 microns in diameter, including PM<sub>2.5</sub>, as represented  
 SO<sub>2</sub> - sulfur dioxide  
 VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

Emission Sources – Maximum Allowable Emission Rates

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Planned startup and shutdown emissions are included. Maintenance activities are not authorized by this permit.
  - (a) Emission rates are based on and the facilities are limited to an hourly throughput of 1,800 cwts and an annual throughput of 700,000 cwts of rice.
  - (b) Emission rates are based on and the facilities are limited to an hourly throughput of 810 cwts and an annual throughput of 700,000 cwts of rice.
  - (c) Emission rates are based on and the facilities are limited to an hourly throughput of 2,080 cwts.
  - (d) Emission rates are based on and the facilities are limited to an hourly throughput of 800 cwts,
  - (e) Emission rates are based on and the facilities are limited to an annual throughput of 700,000 cwts of rice.
