

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 2992

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source		Air Contaminant		<u>Emission Rates *</u>	
	Name (2)	Name (3)	lb/hr	TPY		
56**	Rip Saws Cyclone Bagfilter			PM10	0.61	2.55
FUG	Road/Wind (4)			TSP		1.12
				PM10		0.56

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP - total suspended particulate including PM10
PM10 - particulate matter less than 10 microns
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 8 Days/week 5 Weeks/year 50 or Hrs/year 2,000

** The actual hourly and annual emissions from the rip saws operation going through Emission Point No. 56 are 0.06 lbs and 0.06 tons, respectively, but other sources from the particleboard facility contribute to the emission rates listed above. The entire particleboard facility operates for 8,400 hours per year, whereas the rip saws only operate for 2,000 hours.
