

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 22439

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

* Emission rates are based on a maximum daily production of 70 standard cabinet door equivalents and a maximum annual production of 18,200 standard cabinet door equivalents (a standard cabinet door equivalent is 3.0 square feet) and the facilities are limited by the following maximum operating schedule:
