

# EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 5572B

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

#### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

##### AIR CONTAMINANTS DATA

Emission Rates *	Source	Air Contaminant	<u>Emission</u>
Point No. (1)	Name (2)	Name (3)	lb/hr
TPY **			

- (1) Emission point identification - either specific equipment designation or emission point number (EPN) from a plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1  
PM - particulate matter suspended in the atmosphere including PM<sub>10</sub>.  
PM<sub>10</sub> - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns in diameter is emitted.  
NO<sub>x</sub> - total oxides of nitrogen  
SO<sub>2</sub> - sulfur dioxide  
CO - carbon monoxide
- (4) Emission rate is an estimate and compliance is demonstrated by meeting the requirements of the applicable special conditions and permit application representations.
- (5) Tanks D-104 and D-105 shall not be filled simultaneously.
- (6) Emission rates include routine product transitions at the "C" polypropylene production line.
- (7) Emission rates are due to routine shutdowns and start-ups of the "C" polypropylene production line for maintenance purposes.
- (8) Hexane emission rates are included under VOC emissions. Total annual cap of hexane emissions from all associated emission sources (EPNs 19/20, 33, 44, 49, 52, and 140) shall be less than 10 tpy. Records of hexane emissions shall be maintained as required in Special Condition No. 24.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:  
8,760 hrs/year

\*\* Compliance with annual emission limits is based on a rolling 12-month period.
